Employment history

PT. Senja Solusi, Indonesia (On-site)

Front-end & design | Apr 2022 – Jan 2025

- Created the UCollect microsite using Figma, ensuring a seamless design that integrates cohesively with the MyPertamina app to provide a unified user experience.
- Designed and developed a demo website for a SaaS product using the Svelte 5 JavaScript framework. Delivered the project successfully within an ambitious 4-day deadline.
- Served as a supporting Frontend Engineer, utilizing the Nuxt.js framework to build and optimize the landing page for the multinational company GoMining.
- Worked as a Frontend Engineer at Photobook.ai in Singapore, specializing in building seamless user experiences with Svelte. Responsibilities included creating and maintaining frontend components, collaborating with cross-functional teams, and enhancing web app.
- As the pioneering engineer on the team, I initiated the design and executed the front-end development using the Flutter framework for iOS and Android, successfully achieving over 10,000 downloads and maintaining a 4-star rating.

Skills

Front-end engineering

- Create beautiful front-end designs both inside and out using the Flutter framework for mobile apps and the Svelte framework for web apps.

Design

- Craft software designs with thoughtful UI/UX, cohesive aesthetics, and a consistent design language system using Figma, ensuring developers can work with them comfortably.
- Create interactive animations with Rive that work seamlessly across all popular platforms.
- Draw an illustrative asset for UI/UX purposes.

Education

Telkom University

Unfinished | Informatics

2015 – 2020 | Bandung, Indonesia

Achievements

- Achieving over 10,000 downloads and maintaining a 4-star rating.

Language

- **English:** Professional working proficiency
- **Indonesian:** Native or bilingual proficiency

Soft skills

Adaptability

- Capable of adapting to new technologies and eager to learn in an ever-changing tech world. To adapt, I use X to read and follow individuals responsible for creating and advancing those technologies.

Communication

- I mindfully tailor how I express my ideas based on the audience, whether technical or non-technical, to ensure the team doesn't miss any important details and that we make the best possible decisions.
- I treat my code like prose, adding inline comments to facilitate technical communication among developers.

Equipment

- Drawing tablet
- MacBook Air M1
- PC Windows 11

Hobby

- Drawing
- Sound design
- Watching Christopher Nolan movies
